Better Carts for Better Outcomes

CLIENT SUCCESS STORY

ORACLE
Health

BACKGROUND

Cerner, now known as Oracle Health, supports providers, payers, and public health organizations with a secure, comprehensive suite of cloud-based solutions. Its unified solutions are built on enterprise-grade infrastructure, help safeguard patient data, and streamline operations and administrative functions. Near real-time insights are another benefit, which allows for connected, efficient care. Using AI, the company provides actionable insights that help deliver efficient, enhanced care. Cerner was interested in the RxStation Automated Medication Dispensing Cabinet.

CHALLENGES

Cerner was looking for an existing product that could be modified to fit its specific needs: They wanted to offer similar medication dispensing and administration inside of an operating room via a mobile platform.

OUR SOLUTION

After successful collaboration, prototyping, and testing between Cerner and Waterloo's development teams, the RxStation Anesthesia Cart became generally available in 2017. This product is a modified version of the Phoenix LTC "StatSafe", but utilizes Cerner's advanced technology to control access to the Anesthesia Cart drawers and bins while fully integrating with Cerner's core product line
