

At Waterloo Healthcare, we design, manufacture, service, and sell the best and most durable, fully-welded frame, unibody-framed medical storage carts in the world.

Our high quality and flexible medical cart solutions can accommodate any clinician's needs and are offered in traditional steel and aluminum constructions.

TRADITIONAL STEEL

ELITE ALUMINUM

Which One Is Right for You?

Our steel carts are economical and are ideal for environments where:

- Cart remains fairly stationary
- No need for many exterior mounted accessories
- Traditional look is preferred
- Some additional cart-top work surface is needed
- Drawer dividers are not required
- Budget conscious solution is a priority

Our aluminum carts are 30% lighter and are most fitting in environments where:

- Cart fairly nonstationary and moved frequently
- Cart needs lots of exterior mounted accessories
- Contemporary look is preferred
- Maximum cart-top work surface is needed
- Most drawers require dividers
- There might be future need to add individual drawer locks easily
- Overall best value solution is important
